

The book cover features a vibrant, fantastical illustration. At the top left, a wizard with a long white beard and a blue pointed hat with yellow stars is depicted. A large, glowing yellow orb, resembling a full moon or a magical light source, is the central focus, with a hand reaching out from the top right to touch it. The title 'Fantastic Book of Logic Puzzles' is written in a large, elegant, red script font across the middle of the orb. Below the orb, a green dragon with a scaly body and a long, spiky tail is shown in profile, its mouth open as if breathing fire. In the bottom left corner, a small, illuminated castle with several towers is visible against the dark purple background.

Fantastic Book of Logic Puzzles

The puzzles you'll meet inside this book are the world's greatest and most baffling. They are logic puzzles, the same kinds that have confounded the wisest of the wise for centuries. To solve them, you need a plan of attack and logical reasoning. This book will show you how to develop both.

Each chapter starts with easy examples of a specific puzzle type. And then the puzzles get tougher. You get "clues" that you can use when you need them—sometimes an idea, sometimes a reminder. You'll find strategies. You'll learn tactics. You'll go on to solve tougher puzzles than you ever thought possible.

It's amazing how quickly this book will spark your imagination and sharpen your thinking. You'll enter fantastic mythical kingdoms, the worlds of dragons and dungeons, aliens and astronauts, wizards and genies. And when you do, your mind may never be the same again!
